DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Claims 1-28 and 33-37 have been canceled as drawn to a non-elected invention.

Authorization for this examiner's amendment was given in the election dated 2/25/05 by Steven E. Warner

Allowable Subject Matter

Claims 29-32 and 38 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The closest prior art of record does not teach or render obvious the claimed two deflection electrodes at least partially buried in the two groove portions wherein each of the groove portions has a shape to lock the buried portion of the deflection electrode in the groove portion. The closest prior art of record, Muraki (5,905,267), teaches deflection electrodes, but these electrodes form the substrate rather than fit in grooves in the substrate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
